Executive Summary

This analysis updates the aggregate 2023 analysis by providing a retrospective and concurrent review of the success rates of disputed accident benefit claims decided by the Licence Appeal Tribunal (LAT), incorporating decision data up to December 2024.

The analysis is based on a total of 5,670 substantive decisions stored and indexed in inHEALTH's LAT Compendium, representing an increase of 1,181 decisions by the end of 2024.

In addition, 892 Reconsiderations and 155 Judicial Appeals (JA). An increase of 141 and 43 respectively by the end of 2024.

There was an adjustment of 85 additional decisions to the 2023 totals that were released early in 2024. This adjustment resulted in an increase of 1% For Insured Applicant, and a decrease of 1% For Insurance Company. There was no material change to the outcome at the issue level.

Success Rates are considered from three points of view – For Insured Applicant, For Insurance Company and Split. The Split decisions measure is where some items listed within the application were awarded.

There was a demonstrative shift in success rates favouring the insurance companies in 2024, an increase of 4% over the previous 2023 year of 70%. While the splits remained fairly consistent at 18%, the success rates for insured applicant dropped from 11% to 8%.

This analysis includes:

- Overall Decision Outcome
- Overall Decision By Adjudicator based on critical mass
  - Group A (50 or more decisions)
  - Group B (10-49 decisions)
  - Group C (9 or less decisions)
- Success Rates by Issues type
- Issue Specific Success Rates by Adjudicator
  - MIG*
  - IRB*
  - CAT*
  - MED/Rehab (Treatment, Rehab Benefits, Assessments (Including CAT Assessments))
- Self-represented - Overall Success Rate and by Issue(s) type
- Success Rate by Reconsiderations and Judicial Appeals/Reviews
  - Upheld
  - Overturned
  - Varied
  - Rehearing

Overall Decision Outcome % Success Rate

Release Year (Decisions)	For Insured Applicant	For Insurance Company	Split
2017 (367)	33%	56%	11%
2020 (729)	16%	66%	18%
2023* (1,162)	11%*	70%	19%
2024 (1,101)	8%	74%	18%

**An additional 54 decisions were added in 2024, with a 2023 release date. The outcomes reported in the previous analysis were 10% For Insured Applicant, 71% For Insurance Company, and 19% Split.*

Executive Summary

Adjudicators

As of December 2024, the LAT had a total of **184 Adjudicators** with decisions released between April 2016 and December 2024, an **increase of 52 Adjudicators** since the previous analysis total of 132 Adjudicators.

A detailed breakdown of the number of decisions by Adjudicator and issue type is provided in **Appendix 1**, which has been updated to include an **asterisk** (*) next to the names of adjudicators who are no longer with the AABS service.

There has been a significant growth in Adjudicators in Group C (9 or less decisions) in 2024 with an increase from 48 to 84 adjudicators, an increase of 75%. Since the number of adjudicators is an aggregate of lifetime numbers, shifts in the number of decisions can occur. Most likely, this growth in numbers could signal new adjudicators with recent appointments.

Reconsiderations

Further to the 2023 analysis, Reconsiderations and JA's lifetime have been presented by both volume, success rates (upheld; remitted back for rehearing; varied; or overturned), and initiating party. **Reconsiderations were further presented by the critical date of February 7, 2019 when reconsiderations can be heard by any member of the Tribunal, including the one who decided the original matter.**

In 2024, the number of Reconsiderations increased by 141, while JA's rose by 43. The percentage of the "upheld" category for both appeal types remained fairly consistent with the aggregate results from 2023.

Notably, there was a significant increase in matters remitted for Rehearings from the 2023 analysis. Rehearings from reconsiderations increased by 27%(30 to 38), while Rehearings from JA's increased by 60% (15 to 24).

This analysis reflects lifetime data based on the current dispute resolution system, without accounting for procedural or legislative changes over the past nine years. Notably, the inclusion of 2024 data highlights an increase in Judicial Appeals, which may have an impact in the coming year. Further analysis of specific issues could also provide insights to inform changes in practice.

We would be pleased to provide you with any additional details.

Yours truly,
May Gibillini
President

	Upheld		Rehearing	Varied	Overturned	
Reconsiderations (892)*	704	79%	38	89	61	21%
Judicial Appeal/ Review (144)**	101	72%	24	5	11	28%

*An additional 31 Reconsiderations were added in 2024, with a 2023 release date.
**Judicial Appeals total count included 11 motions, which were removed from this chart, as they were based on procedural matters.

Data Structure & Outcome Measures

inHEALTH created the LAT Compendium in response to the need for a data repository specific to the AABS decisions and the accident benefits industry. Access to LAT decisions is straightforward and assists stakeholders in applying the SABS to their unique situations.

The LAT Compendium operates differently than the FSCO decision database and CanLII. It allows for specific issue-based searches, with organized search filters across multiple variables, to optimize risk assessment and better anticipate outcomes.

Outcomes can be either based on the overall decision or discrete issues/ items. For the purposes of this report the data provided is based on both the overall result and in some instances the discrete issues within dispute as described in the chart below.

Issue	Data Collection Method
MIG	*Overall by Issues in Dispute Splits were added to 'For Applicant' outcome
IRB	*Discrete Items Listed Pre: IRB 104: includes Initial Entitlement, Entitlement, and Continuing Entitlement Post: IRB-Post 104
CAT	*Overall by Issues in Dispute Pre June 1: Tagged CAT-Determination-Pre June 1, 2016 Post June 1: Tagged CAT-Determination-Post June 1, 2016
MED/Rehab	*Overall by Issues in Dispute Includes: MED, Assessments (including CAT Assessments), Rehabilitation Benefits
Self-Represented	Includes: Applicant Counsel with Self-Represented or Not Reported

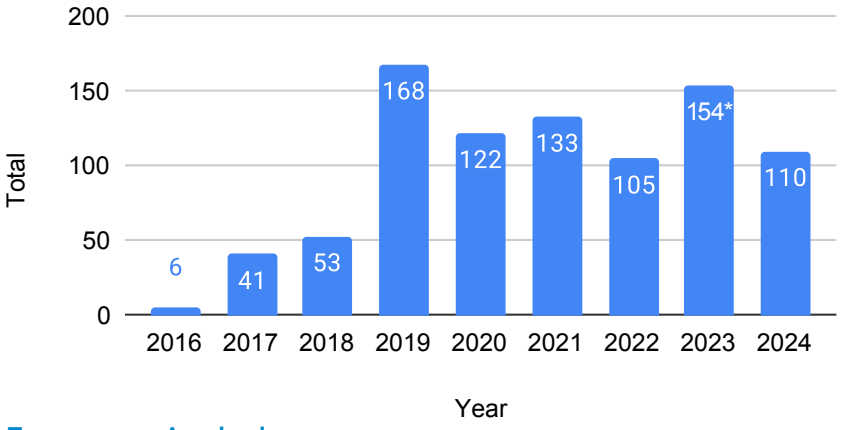
14 Reconsiderations

This represents the total number of Reconsideration decisions lifetime.



Within these decisions the outcome measures can be for specific items within the decision which are recorded as Upheld, Overturned, Varied, or sent back to Rehearing*. 21% of all Reconsiderations resulted in a Rehearing, Varied, or Overturned.

In comparison with the previous analysis, Upheld decisions have increased by 19% (590 to 704), Overturned increased by 11% (55 to 61), Varied increased by 17% (76 to 89) and Rehearings increased by 27% (30 to 38).

Since the previous analysis, 31 reconsiderations were added to 2023.

From 2023 Analysis

	Initiated By Insured	Initiated By Insurer	Both	Executive Chair	Total
Upheld	479*	136*	4	0	619*
Overturned	32	23	0	0	55
Varied	28*	40*	10	0	78*
Rehearing	14	14	0	2	30
Total	553*	213*	14	2	782*

The numbers have been updated to reflect all 2023 decisions released the following year.

Current Update

	Initiated By Insured	Initiated By Insurer	Both	Executive Chair	Total
